## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1714

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Herbst et al, US Patent No. 6,528,556.
3. The rejection is repeated for reasons of record set forth in the previous office action.
1. Herbst et al discloses polymeric compositions that contain a biocidal agent in an amount of 0.1 to 10% by weight. Suitable copolymers disclosed by Herbst et al include EVA/carbon monoxide copolymers. Suitable biocides include 4,5 dichloro-2-n-octyl-4-isothiazolin-3-one. See col. 1, line 49 through col. 2, line 16; col. 3, lines 9-11 and col. 5, line 50 through col. 6, line 4.
4. No patentable difference is ascertained between present and patented compositions.

Applicant's arguments filed 1-21-04 have been fully considered but they are not persuasive.

Applicant is advised that his claim utilize the term "comprising" which does not exclude components which do not adversely affect the composition. Applicant's invention as claimed could include additional triazine biocides.

The fact that Herbst discloses a large variety of polymeric substrates for which the patented biocides may be used does not negate the fact that applicant's intended polymers are included in that list. Clearly Herbst anticipates the use of these polymeric substrates. In fact applicant

Art Unit: 1714

indicates that ultimately the presently claimed biocidal compositions will be incorporated into polymeric substrates as set forth by Herbst.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
